

FEATURES

- 6.95V Shunt Reference
- Guaranteed 0.5ppm/°C Temperature Coefficient
- Guaranteed 1Ω Maximum Dynamic Impedance
- Guaranteed 20μV_{RMS} Maximum Noise
- Guaranteed Initial Tolerance of 2%
- Wide Operating Current Range
- Available in 4-Lead TO-46 Metal Can

APPLICATIONS

- Precision Voltage Reference for Multimeters
- Calibration Equipment Voltage Standards
- Laboratory Measurement Equipment
- Industrial Monitor/Control Instruments
- High Accuracy Data Converters

DESCRIPTION

The **LM199/LM399** precision shunt reference features excellent temperature stability over a wide range of voltage, temperature and operating current conditions. A stabilizing heater is incorporated with the active Zener on a monolithic substrate which nearly eliminates changes in voltage with temperature. The subsurface Zener operates over a current range of 0.5mA to 10mA, and offers minimal noise and excellent long-term stability.

Ideal applications for the LM199/LM399 include digital voltmeters, precision calibration equipment, current sources and a variety of other precision low cost references. A 10V buffered reference application is shown below.

ELECTRICAL CHARACTERISTICS

The ● denotes the specifications which apply over the full operating temperature range, otherwise specifications are at $T_A = 25^\circ\text{C}$. (Note 3)

SYMBOL	PARAMETER	CONDITIONS	LM199/LM199A			LM399/LM399A			UNITS
			MIN	TYP	MAX	MIN	TYP	MAX	
$\frac{\Delta V_Z}{\Delta \text{Time}}$	Long-Term Stability	Stabilized, $22^\circ\text{C} \leq T_A \leq 28^\circ\text{C}$, 1000 Hours, $I_R = 1\text{mA} \pm 0.1\%$		8	(Note 4)		8	(Note 4)	ppm/ $\sqrt{\text{kH}}$
I_H	Temperature Stabilizer Supply Current	$T_A = 25^\circ\text{C}$, Still Air, $V_H = 30\text{V}$ $T_A = -55^\circ\text{C}$ (Note 5)		8.5 22	14 28		8.5	15	mA
V_H	Temperature Stabilizer Supply Voltage	●	9		40	9		40	V
	Warm-Up Time to $\pm 0.05\% V_Z$	$V_H = 30\text{V}$		3			3		Seconds
	Initial Turn-On Current	$9\text{V} \leq V_H \leq 40\text{V}$ (Note 5)		140	200		140	200	mA

Note 1: Stresses beyond those listed under Absolute Maximum Ratings may cause permanent damage to the device. Exposure to any Absolute Maximum Rating condition for extended periods may affect device reliability and lifetime.

Note 2: The substrate is electrically connected to the negative terminal of the temperature stabilizer. The voltage that can be applied to either terminal of the reference is 40V more positive or 0.1V more negative than the substrate.

Note 3: These specifications apply for 30V applied to the temperature stabilizer and $-55^\circ\text{C} \leq T_A \leq 125^\circ\text{C}$ for the LM199; and $0^\circ\text{C} \leq T_A \leq 70^\circ\text{C}$ for the LM399.

Note 4: Devices with maximum guaranteed long-term stability of 20ppm/ $\sqrt{\text{kH}}$ are available. Drift decreases with time.

Note 5: This initial current can be reduced by adding an appropriate resistor and capacitor to the heater circuit. See the Typical Performance Characteristics graphs to determine values.

Note 6: Guaranteed by "Reverse Breakdown Change with Current."

Negative Heater Supply with Positive Reference

Standard Cell Replacement

The diagram shows a precision 10V reference circuit. A 12V to 18V supply is connected to the circuit. The LM399 is configured as a precision centrabuck, with its output set to 6.95V. This output is connected to the non-inverting input (pin 3) of the LT1001AC. The inverting input (pin 2) is connected to the same supply rail through a 200k resistor. The output of the LT1001AC (pin 6) is connected to the supply rail through an 8.8k resistor and to ground through a 5k resistor. A 19k resistor is connected between the output and the inverting input (pin 2). A 3k trimmer is connected between the inverting input (pin 2) and ground. The final output is taken from pin 6, labeled 'OUTPUT 10V'.

PACKAGE DESCRIPTION

Please refer to <http://www.linear.com/designtools/packaging/> for the most recent package drawings.

H Package
4-Lead TO-46 Metal Can
(Reference LTC DWG # 05-08-1341)

* LEAD DIAMETER IS UNCONTROLLED BETWEEN THE REFERENCE PLANE AND .050" BELOW THE REFERENCE PLANE

** FOR SOLDER DIP LEAD FINISH, LEAD DIAMETER IS $\frac{.016 - .024}{(0.406 - 0.610)}$

Thermal Shield* for TO-46, H Package

*THERMAL SHIELD MATERIAL IS VALOX
